Ashraf Khan

Forward Deployed Engineer (FDE) · Multi-Cloud Solutions Architect · Senior Full-Stack Systems Engineer

📍 Mumbai, Maharashtra, India | 📧 ashrafksalim1@gmail.com | 📞 +91-8779559898

🌐 **GitHub**: github.com/aashiq-parinda | 💼 **LinkedIn**: linkedin.com/in/ashrafksalim | 📱 **10+ Published Apps** (App Store & Play Store)

🎯 Professional Executive Summary

Accomplished **Forward Deployed Engineer (FDE) & Multi-Cloud Solutions Architect** with **5+ years of production software engineering experience**, **10+ published commercial applications**, and **3 enterprise FDE system deployments**. Specializes in bridging enterprise operational challenges with resilient multi-cloud architectures (AWS Fargate, Azure Container Apps, Terraform IaC, TimescaleDB, PostgreSQL), zero-trust security governance (HIPAA, PCI-DSS, Level 2 VAPT, SEBI/RBI standards), and high-throughput microservices (FastAPI, Flask, Node.js, gRPC). Proven track record of delivering direct enterprise financial impact, including **₹4.5 Crore/yr integration savings**, **₹1.8 Crore/yr administrative savings**, and **₹25.20 Crore/yr line-halt prevention**.

🏗️ Forward Deployed Engineering (FDE) & Multi-Cloud Portfolio Projects

1. **Industrial Predictive Maintenance Telemetry Platform** | `industrial-predictive-maintenance`

- **Enterprise Problem:** Provisioned real-time predictive telemetry pipeline for a Tier-1 automotive manufacturer losing **₹25.20 Crore/year** to stamping line halting.
- **Technical Core:** Edge vibration, temperature, and RPM telemetry stream processed using statistical Z-scores, Redis pub/sub buffers, and an `IsolationForest` ML model for failure prediction. Built automated Terraform IaC for AWS Fargate, RDS (TimescaleDB), and VPC.
- **Impact & Metrics: 12.4ms telemetry ingestion-to-detection latency**, **₹90 Lakhs/month net savings**, **421% Year 1 ROI**, and a **2.3-month payback period**.

2. **Healthcare Patient Intake & Safety Summarization Platform** | `healthcare-intake-summarization`

- **Enterprise Problem:** Engineered patient charting and triage platform for a healthcare clinic network processing **15,000+ monthly patient intakes**, where medical liability rules strictly prohibit LLM-generated diagnoses.

- **Technical Core:** Hybrid Full-Text Search (FTS) indexing clinical protocols paired with a deterministic, LLM-independent Python **Programmatic Safety Filter** (lexical blacklist + syntactic regex matching) to intercept diagnostic leakages before database write-back.
- **Impact & Metrics: 0.0% Diagnostic Leakage Rate** (enforced by gatekeepers), **96.5% Red-Flag Recall**, physician reading time cut by **85%** (under 45s), and **₹1.8 Crore/year administrative savings**.

3. Enterprise Multi-Cloud Integration & Failover Platform | `enterprise-integration-platform`

- **Enterprise Problem:** Consolidated four legacy transactional feeds (REST API, legacy SOAP/XML, mainframe CSV files, and signed webhooks) into a unified relational schema for an acquired distributor.
- **Technical Core:** Configuration-driven polling loops executing network calls with exponential backoff retries and random jitter, separating schema mapping errors into a Dead Letter Queue (DLQ) table. Complete multi-cloud infrastructure abstraction (AWS Fargate vs. Azure Container Apps) built with Terraform.
- **Impact & Metrics: 100% Data Preservation** via DLQ routing, **₹4.5 Crore/year integration savings**, and a documented failover DNS runbook proving Azure Container Apps is **30% cheaper** than AWS ECS Fargate for this workload.

🌐 Published Commercial Mobile Applications & Enterprise Portals

📱 Published Commercial Mobile Applications (App Store & Play Store)

- **Lead Yatra (Reliance / IndusInd Bank)**: App Store Link | Google Play Link — Enterprise field sales lead capture & banking venue booking system powering IndusInd Bank operations.
- **MAXX AI Voice Assistant**: App Store Link — Enterprise voice AI assistant with custom wake-word activation & multi-advisor conversational flows via Millis.ai.
- **Kokomo 24/7**: App Store Link — Scalable enterprise 24/7 operational service management platform.
- **FitWell | All-in-One**: App Store Link — HIPAA-compliant health platform with biometric auth, CDC/CMS reporting, and private Jitsi video consultations.
- **InstaQuote 2.0 by HDFC Life**: App Store Link | Google Play Link — Instant insurance quoting & financial premium calculation engine.

💻 Enterprise Web Portals

- **Monitor Health AI (Primary Landing)**: `monitorhealth.ai` — Commercial AI healthcare landing page & sales engine.

- **Remote Survey Portal**: `survey.monitorhealth.ai` — HIPAA-compliant remote health survey platform.
- **Institutional School Platform**: `main.di10toj4buhn9.amplifyapp.com` — Multi-tenant health tracking platform for educational institutions.

💼 Professional Experience

Senior Software & Systems Engineer | Logicloop *(Mumbai, India | Jan 2026 – Present)*

- **Lead Yatra (Reliance IndusInd)**: Architected cross-platform Flutter application optimizing field sales lead capture and venue booking at enterprise scale, securing banking data for IndusInd Bank operations.
- **MAXX AI Voice Assistant**: Developed end-to-end AI voice assistant featuring custom wake-word activation and multi-advisor conversational flows powered by Millis.ai.
- **Team Leadership & DevOps**: Led 3 developers, established GitHub Actions CI/CD pipelines (40% deployment overhead reduction), and enforced Level 2 VAPT security standards across financial flows.

Full-Stack Developer & Data Custodian | Fitwell Technologies Inc. *(Remote – VA, USA | Jun 2025 – Present)*

- **Monitor Health AI Ecosystem**: Built commercial landing page (`monitorhealth.ai`), remote survey portal (`survey.monitorhealth.ai`), and multi-tenant institutional school platform (`amplifyapp.com`).
- **Private Cloud & Telehealth Video**: Deployed Flask microservices on AWS (EC2, S3, ELB), private Supabase cloud backend on EC2 for PHI data isolation, hosted private Jitsi Meet server for HIPAA-compliant consultations, and integrated Amazon Connect workflows.
- **Data Custodianship & Compliance**: Owned PHI data governance as data custodian, maintaining zero data breach posture and Level 2 VAPT security.

Lead Software Engineer | QuantGen Private Limited *(India | Nov 2024 – Jun 2025)*

- **Fitwell AI - All-in-One**: Led full-stack React Native development for HIPAA-compliant wellness platform with biometric auth, goal tracking, and CDC/CMS health reporting.
- **Kokomo 24/7**: Architected enterprise mobile solution for 24/7 service operations; built admin panel on AWS App Runner with AWS ECS orchestration and private Jitsi video servers.

Software Engineer | Logicloop *(Mumbai, India | May 2024 – Oct 2024)*

- **HDFC Life InstaQuote**: Built Flutter frontend for instant insurance quoting, financial premium calculations, and lead generation workflows.

Software Engineer | SoftProdigy *(Remote – USA | Nov 2023 – Apr 2024)*

- Developed loan lending application workflows in Flutter and implemented gRPC Client API libraries.

Senior Software Development Engineer | AKcess Labs Pvt. Ltd. *(Remote – London, UK | Jan 2023 – Nov 2023)*

- Built Flutter cross-platform applications with Flask backends; created the *CityShop* hyperlocal commerce application.

Software Developer | We3.Tech *(Maharashtra, India | Aug 2021 – Jan 2023)*

- **Mangal Keshav eKYC App**: Integrated eKYC and Digio eSign SDKs for digital onboarding.
- **Motilal Oswal MO Investor**: Delivered Add Funds module with banking API integrations and cryptographic security compliant with SEBI and RBI guidelines.

Unity Game Developer (Intern) | IDZ Digital Pvt. Ltd. *(Mumbai, India)*

- Prototyped 12+ interactive mobile games for KidloLand in Unity 3D.

💻 Technical Skills & Core Competencies

- **Multi-Cloud & Infrastructure**: Terraform (IaC), AWS (Fargate, ECS, EC2, S3, ELB, App Runner, RDS, VPC), Azure (Container Apps), GCP, Docker, GitHub Actions CI/CD.
- **Data & Streaming Engineering**: TimescaleDB, PostgreSQL (asyncpg, Full-Text Search), Redis Pub/Sub, Dead Letter Queues (DLQ), Exponential Backoff Jitter.
- **Software & Systems Engineering**: Python (FastAPI Async, Flask), Node.js, Flutter (Lead), React Native, Android (Java/Kotlin), iOS (Swift), REST, gRPC, Protobuf, WebSockets.
- **ML & Analytics**: scikit-learn (`IsolationForest` Telemetry), Vector Search, Programmatic Safety Filters, LLM RAG, OpenCV.
- **Compliance & Security**: HIPAA, PCI-DSS, SEBI / RBI Guidelines, CDC/CMS Health Reporting, Data Custodianship & Governance, Level 2 VAPT, Biometric Auth, eKYC, Digio eSign.

🎓 Education & Certifications

Education

- **B.Sc. in Computer Science** | Rizvi College, Mumbai University *(2017 – 2020)* — **CGPA:** 9.33 / 10.00
- **Vocational Computer Science / HSC (12th)** | M.H. Saboo Siddik Polytechnic, Mumbai *(2015 – 2017)* — **Percentage:** 75.80%

Certifications & Compliance

- **Bioinformatics & Genomics**: Genomics & Proteomics Analysis.
- **Healthcare Compliance**: Healthcare API Compliance & HIPAA PHI Data Governance.
- **FinTech Standards**: FinTech Regulatory Standards & PCI-DSS Payment Processing.
